

Shamley Green Environment Group - latest Wildflower Diary now out

The Autumn edition of the Environment Group Wildflower Diary is out on our website now, so why not have a look to find out what can be seen in and around Shamley Green as the year draws to a close. There are not only autumn fruits but also lovely wild flowers still to be found, and fascinating seed heads with ingenious dispersal strategies, all on our doorstep. In 2022 we have identified about 170 different species in our village!

The Wildflower Diary has become a popular handy guide, showing what is in flower each month with super pictures and lots of information. Loyal readers can probably identify the two species shown here (answers on the website news page!)

The Autumn edition will be the last this year, see www.shamleygreenenvironment.co.uk/wildflowerdiary
