

The SGE Wildflower Diary

Are you a nature lover? Do you go for walks around the village, maybe when family and friends are visiting? And do you wonder about the wildflowers you see? – there are lots around here, at least 180 species!

Well next time you're planning a local walk, why not have a look at the Shamley Green Environment Group Wildflower Diary – it's packed with photos of our local flora, with interesting information and ID tips for some of the lovely wildflowers you will certainly see when you're out and about. The Spring edition for 2024 was published in March, and there will shortly be another one on our website for early summer, but there are also diaries there for 2022 and 2023 as well so you can find out what you are likely to see at any time of the year.

The Wildflower Diary has grown out of the Environment Group monitoring our wildflowers to see how things go with the new reduced mowing regime in the village.

Do have a look at the diary: you can go to www.shamleygreenenvironment.co.uk or scan this QR code with your phone.

And for even more information have a look at the wildflowers page, where you can click on photos of local species for links to detailed ID tips

**Greater stitchwort on Lords Hill
Common**
