

Shamley Green Environment Group have been out planting bulbs this autumn

Following on from last year's successful wildflower and bulb planting on our main commons, some residents from Nursery Hill and Hullmead approached SGEG with some planting ideas for their parts of the village. Following discussion with the Parish Council and Waverley Borough Council during the summer, and a walk round with residents in July, a planting scheme was agreed.

On Saturday 26th November a group of volunteers gathered to do the planting. A carpet of purple crocuses have been planted near the bus stop at the entrance to Nursery Hill. More daffodils have been planted along the B2128 near the Nursery Hill road sign and then more bulbs have been planted on the bank as the road divides in the estate. Daffodil bulbs have also been planted in Hullmead on the open piece of ground as the road bears right.

Our next project is to support our lead volunteer Kate and Hampshire Swifts on the installation of swift boxes this January.

In January we also start Toad (and frog and newt) Patrol evenings which continue through February and March. This involves committing to one or two evenings a week for at least an hour around dusk to remove migratory amphibians on their way to their breeding ponds. Do contact us if you would like to join us.

If you would like to get involved at all with any of our projects contact us via our website, Shamley Green Environment Group
